

Faculty of Information Technology (FIT) – Ho Chi Minh City University of Science (HCMUS)

CS423 / CSC15003 – Software Testing (AI-augmented · 2026)

AI POLICY · TEMPLATES — 2026 v1.0

AI Use Agreement – Software Testing (CS423/CSC15003)

Course-level agreement adapted for FIT@HCMUS. Read, sign, and submit the Acknowledgement at the start of the term.

Adapted from Med Kharbach, PhD (2026) — AI Use Policy Templates for Higher Education. CC BY-NC-SA 4.0. This adaptation is prepared for FIT@HCMUS – CS423 / CSC15003 Software Testing course.

1. Course Information

Field	Value
Course	CS423 / CSC13003 – Software Testing (AI-augmented)
Faculty	Faculty of Information Technology (FIT) – HCMUS
Term	2026
Lecturers / TAs	Dr. Lam Quang Vu / Dr. Tran Duy Hoang / MSc. Tran Thi Bich Hanh / MSc. Truong Phuoc Loc / MSc. Ho Tuan Thanh
Contact	lquvu@fit.hcmus.edu.vn / tdhoang@fit.hcmus.edu.vn / ttbhanh@fit.hcmus.edu.vn / tploc@fit.hcmus.edu.vn / hthanh@fit.hcmus.edu.vn
Faculty-provided AI account	Any AI Tool (e.g., ChatGPT, Claude, Gemini, Copilot, Cursor)
Companion templates	AI Audit Report · Disclosure Form · Reflective Statement · Privacy Checklist · Student Acknowledgement

2. Course Position on AI

In this course, AI tools may be used in specific ways to support learning, test design, scripting, evaluation, and study. AI use must be transparent, ethical, and aligned with course outcomes G1–G8 (traditional Bloom) and G9.1–G9.6 (Post-AI Bloom Taxonomy, Hardman 2025). Students remain responsible for the final quality, originality, and correctness of any submission.

3. Relationship to Institutional Policy

This course agreement operates within the HCMUS Academic Integrity Code and the FIT Code of Practice. Where institutional rules are stricter, they prevail. Where course rules are stricter (e.g., requiring an AI Audit Report), students follow this agreement.

4. AI Use Categories

Every assignment is mapped to ONE category. Confirm the category in the assignment cover page before starting any task.

Category	Description
Cat. 1 – No AI Permitted	AI tools may not be used at all. The work must be completed unaided. Applies to: Midterm, Final, Week-4 Domain-Testing paper workshop.

Cat. 2 – AI for Preparation Only	AI may be used for brainstorming, concept review, study questions. May NOT generate any part of the final artifact.
Cat. 3 – AI for Feedback and Revision	AI may critique, suggest improvements, or polish language AFTER the student produces a complete draft.
Cat. 4 – AI-Assisted Production	AI may generate parts of the work while the student designs, audits, and integrates. Applies to most HW (HW#00–HW#08).
Cat. 5 – AI-Integrated Work	AI is a core methodological tool. Applies to: Seminar research, Capstone.

5. Bloom-AI CLOs (G9.1–G9.6)

Code	Level	Required activity
G9.1	Understand	Critique AI-generated mindmaps or concept summaries; spot ≥ 3 mistakes.
G9.2	Apply	Use AI to draft test cases, scripts, or analyses; then run and refine them.
G9.3	Analyse	Audit AI artefacts; tag VALID / INVALID / INCOMPLETE; add missed edge cases.
G9.4	Collaborate	Pair AI + human in a team workflow; document who did what.
G9.5	Create	Design a new AI-augmented tool, plugin, or evaluation harness.
G9.6	Disrupt	Propose a Continuous-AI workflow that changes the testing process itself.

6. Acceptable AI Use

- Generate first-draft test cases that you then audit and improve.
- Brainstorm exploratory testing scenarios or risk areas.
- Translate ISTQB definitions into your own words for study.
- Get feedback on a draft test plan you already wrote.
- Use an AI Tool (e.g., Cursor / Copilot) to scaffold Playwright/Selenium scripts you then verify.
- Use an AI evaluation tool (e.g., Promptfoo, DeepEval, Ragas) to evaluate an LLM-based feature.

7. Unacceptable AI Use

- Submitting AI-generated work without disclosure or audit.
- Fabricating sources, citations, defect references, or benchmark numbers.
- Using AI on Closed-book exams (Midterm, Final).
- Uploading personal data, employer code, or other people's IP to public AI tools.
- Bypassing required hand-coded work (e.g., Domain-Testing paper workshop).
- Coordinating prompts with classmates to converge on identical answers.

8. Disclosure Requirement

Every AI-assisted submission must attach: (i) an AI Audit Report (5-section template per artifact), (ii) a prompt log with timestamps, and (iii) an AI Use Disclosure Form. The Mandatory Disclosure paragraph from the course syllabus must appear at the end of the report.

9. Privacy, Data, and Intellectual Property

- You may use any AI tool that fits your workflow; declare it in the AI Audit Report.
- Never upload student records, classmates' code, or confidential SUT data.
- Treat AI output as draft only — verify all references and quotes.
- Do not paste copyrighted reading materials wholesale into AI tools.

10. Anti-Cheat Mechanisms

The following artifacts MUST NOT be AI-generated. They are verified during grading.

- Photos of physical devices with your student-ID card in the same frame.
- Videos of test executions with your own voice narration.
- Live debug sessions during oral defense (TA changes 1 selector, you fix in 10 min).
- Hand-written or typed reflection paragraphs after Week-4 paper workshop.
- Mantis bug reports filed with reporter = your StudentID.
- Random 10–30% of students invited to a 5–7-min oral defense.

11. Discipline-Specific Expectations — Software Testing

- Test design: AI for first-draft, you for boundary + security cases.
- Bug reports: 100% student-written; AI may not draft the description.
- Coverage metrics: AI may compute, you must explain WHY a path matters.
- Performance results: AI may suggest interpretation, you verify against raw .jtl.

12. Instructor Use of AI

Instructors may use AI to draft slides, design rubrics, generate practice questions, or improve accessibility. All AI-generated instructional content is reviewed and adapted by the human instructor before delivery to students.

13. Review and Updates

This agreement may be revised during the term as tools evolve. Changes are communicated via the FIT Moodle and verified during the first 15 minutes of the next class.
