

Faculty of Information Technology (FIT) – Ho Chi Minh City University of Science (HCMUS)

CS423 / CSC13003 – Software Testing (AI-augmented · 2026)

AI POLICY · TEMPLATES — 2026 v1.0

Reflective AI Use Statement

For major Seminars. Required when submitting at AI Category 4 or 5.

Adapted from Med Kharbach, PhD (2026) — AI Use Policy Templates for Higher Education. CC BY-NC-SA 4.0. This adaptation is prepared for FIT@HCMUS – CS423 / CSC13003 Software Testing course.

1. Project & Author Info

Field	Value
Course:	CS423 / CSC13003 – Software Testing
Project / Capstone title:	
Team members (if group):	
Student name:	
Student ID:	
Submission date:	

2. Reflection Questions

1. How did AI support your work?

Describe specifically where and how AI tools contributed to this project: test design, scenario brainstorming, code generation, log analysis, defect triage, documentation, presentation prep, or other tasks.

2. What did you accept, reject, or revise from AI outputs?

Identify which AI suggestions you incorporated, which you discarded, and how you adapted material to fit the spec, ISTQB principles, or your own analysis.

3. What errors, biases, or limitations did you notice in the AI outputs?

Concrete examples: hallucinated functions, wrong boundary, missed security case, confused metrics (e.g., p95 vs top 5%), invented citations, etc.

4. How did you verify information, sources, or claims provided by AI?

Describe the verification method (ran the test, checked the spec, looked up RFC, asked TA, cross-checked another tool, executed on real SUT).

5. What did you learn through this project that you could not have learned by simply accepting AI output?

Reflect on your own intellectual contribution. How did AI shape (or fail to shape) your understanding of testing? What is one principle you will keep for future work?

3. AI Categories Used

Mark all that applied at any stage of the project:

- ☐ Cat. 1 – No AI
- ☐ Cat. 2 – AI for preparation only
- ☐ Cat. 3 – AI for feedback / revision
- ☐ Cat. 4 – AI-assisted production
- ☐ Cat. 5 – AI-integrated work

4. Author Signature

By signing below, I confirm that this reflective statement is honest and accurately represents how AI was used in this project. I take full intellectual responsibility for the final submission.
